	<b>Index</b>	<b>27</b>

It is a Finviz Finance information downloader.

# CHAPTER 1

---

## Installation (python >= v3.5)

---

```
> virtualenv -p python3 virtualenvironment  
> source virtualenvironment/bin/activate  
> pip install finvizfinance
```

## CHAPTER 2

---

### Quote Examples

---

```
import pandas as pd
from finvizfinance.quote import finvizfinance

stock = finvizfinance('tsla')
```

Example downloading chart:

```
stock.TickerCharts(out_dir='asset')
```

Example getting individual ticker information

```
stock_fundament = stock.ticker_fundament()
stock_description = stock.ticker_description()
outer_ratings_df = stock.ticker_outer_ratings()
news_df = stock.ticker_news()
inside_trader_df = stock.ticker_inside_trader()
```

## CHAPTER 3

---

### Screeener Example

---

```
from finvizfinance.screener.overview import Overview
foverview = Overview()
filters_dict = {'Exchange': 'AMEX', 'Sector': 'Basic Materials'}
foverview.set_filter(filters_dict=filters_dict)
df = foverview.screener_view()
df.head()
```

## CHAPTER 4

---

### News Example

---

```
from finvizfinance.news import News
fnews = News()
all_news = fnews.get_news()
# all_news['news'].head()
# all_news['blogs'].head()
```

## CHAPTER 5

---

### Insider Example

---

```
from finvizfinance.insider import Insider
finsider = Insider(option='top owner trade')
finsider.get_insider().head()
```

## 6.1 Quote

Getting individual ticker information.

```
class finvizfinance.quote.Quote  
    quote Getting current price of the ticker
```

```
    get_current (ticker)  
        Getting current price of the ticker.
```

**Returns** price of the ticker

**Return type** price(float)

```
class finvizfinance.quote.Statements  
    Getting statements of ticker
```

```
    get_statements (ticker, statement='I', timeframe='A')  
        Getting statements of ticker.
```

**Parameters**

- **ticker** (*str*) – ticker string
- **statement** (*str*) – I(Income Statement), B(Balace Sheet), C(Cash Flow)
- **timeframe** (*str*) – A(Annual), Q(Quarter)

**Returns** statements table

**Return type** df(pandas.DataFrame)

```
class finvizfinance.quote.finvizfinance (ticker, verbose=0)  
    Getting information from the individual ticker.
```

**Parameters**

- **ticker** (*str*) – ticker string

- **verbose** (*int*) – choice of visual the progress. 1 for visualize progress.

**ticker\_charts** (*timeframe='daily', charttype='advanced', out\_dir="", urlonly=False*)  
Download ticker charts.

**Parameters**

- **timeframe** (*str*) – choice of timeframe (daily, weekly, monthly).
- **charttype** (*str*) – choice of type of chart (candle, line, advanced).
- **out\_dir** (*str*) – output image directory. default none.
- **urlonly** (*bool*) – choice of downloading charts, default: downloading chart

**Returns** url for the chart

**Return type** charturl(str)

**ticker\_description** ()  
Get ticker description.

**Returns** ticker description.

**Return type** description(str)

**ticker\_full\_info** ()  
Get all the ticker information.

**Returns** insider information table

**Return type** df(pandas.DataFrame)

**ticker\_fundament** (*raw=True*)  
Get ticker fundament.

**Parameters** **raw** (*boolean*) – if True, the data is raw.

**Returns** ticker fundament.

**Return type** fundament(dict)

**ticker\_inside\_trader** ()  
Get insider information table.

**Returns** insider information table

**Return type** df(pandas.DataFrame)

**ticker\_news** ()  
Get news information table.

**Returns** news information table

**Return type** df(pandas.DataFrame)

**ticker\_outer\_ratings** ()  
Get outer ratings table.

**Returns** outer ratings table

**Return type** df(pandas.DataFrame)

**ticker\_signal** ()  
Get all the trading signals from finviz.

**Returns** get all the ticker signals as list.

**Return type** ticker\_signals(list)

## 6.2 Screener

Getting screener information.

### 6.2.1 Overview

**class** finvizfinance.screener.overview.**Overview**

Getting information from the finviz screener overview page.

**compare** (*ticker*, *compare\_list*, *order*='ticker', *verbose*=1)

Get screener table of similar property (Sector, Industry, Country)

#### Parameters

- **ticker** (*str*) – the ticker to compare
- **compare\_list** (*list*) – choice of compare property (Sector, Industry, Country) or combination.
- **order** (*str*) – sort the table by the choice of order
- **verbose** (*int*) – choice of visual the progress. 1 for visualize progress

**Returns** screener information table

**Return type** df(pandas.DataFrame)

**get\_filter\_options** (*screen\_filter*)

Get filters options.

**Parameters** **screen\_filter** (*str*) – screen filter for checking options

**Returns** all the available filters

**Return type** filter\_options(list)

**get\_filters** ()

Get filters.

**Returns** all the available filters

**Return type** filters(list)

**get\_orders** ()

Get orders.

**Returns** all the available orders

**Return type** orders(list)

**get\_signal** ()

Get signals.

**Returns** all the available trading signals

**Return type** signals(list)

**screener\_view** (*order*='ticker', *limit*=-1, *select\_page*=None, *verbose*=1, *ascend*=True)

Get screener table.

#### Parameters

- **order** (*str*) – sort the table by the choice of order.
- **limit** (*int*) – set the top k rows of the screener.

- **select\_page** (*int*) – set the page of the screener.
- **verbose** (*int*) – choice of visual the progress. 1 for visualize progress.
- **ascend** (*bool*) – if True, the order is ascending.

**Returns** screener information table

**Return type** df(pandas.DataFrame)

**set\_filter** (*signal=*”, *filters\_dict*={}, *ticker=*”)  
Update the settings.

**Parameters**

- **signal** (*str*) – ticker signal
- **filters\_dict** (*dict*) – dictionary of filters
- **ticker** (*str*) – ticker string

## 6.2.2 Valuation

**class** finvizfinance.screener.valuation.Valuation

Valuation inherit from overview module. Getting information from the finviz screener valuation page.

## 6.2.3 Financial

**class** finvizfinance.screener.financial.Financial

Financial inherit from overview module. Getting information from the finviz screener financial page.

## 6.2.4 Ownership

**class** finvizfinance.screener.ownership.Ownership

Ownership inherit from overview module. Getting information from the finviz screener ownership page.

## 6.2.5 Technical

**class** finvizfinance.screener.technical.Technical

Technical inherit from overview module. Getting information from the finviz screener technical page.

## 6.2.6 Custom

**class** finvizfinance.screener.custom.Custom

Custom inherit from overview module. Getting information from the finviz screener custom page.

**get\_columns** ()

Get information about the columns

**Returns** return the index and column name.

**Return type** columns(dict)

**screener\_view** (*order*=’ticker’, *limit*=-1, *select\_page*=None, *verbose*=1, *ascend*=True, *columns*=[0, 1, 2, 3, 4, 5, 6, 7, 65, 66, 67])

Get screener table.

**Parameters**

- **order** (*str*) – sort the table by the choice of order.
- **limit** (*int*) – set the top k rows of the screener.
- **select\_page** (*int*) – set the page of the screener.
- **verbose** (*int*) – choice of visual the progress. 1 for visualize progress.
- **ascend** (*bool*) – if True, the order is ascending.
- **columns** (*list*) – columns of your choice. Default index: 0,1,2,3,4,5,6,7,65,66,67.

**Returns** screener information table

**Return type** df(pandas.DataFrame)

## 6.2.7 Tickers

**class** finvizfinance.screener.ticker.Ticker

Financial inherit from overview module. Getting information from the finviz screener ticker page.

**screener\_view** (*limit=-1, verbose=1*)

Get screener table.

**Parameters** **verbose** (*int*) – choice of visual the progress. 1 for visualize progress.

**Returns** get all the tickers as list.

**Return type** tickers(list)

## 6.3 Group

Getting group information.

### 6.3.1 Overview

**class** finvizfinance.group.overview.Overview

Getting information from the finviz group overview page.

**get\_group** ()

Get groups.

**Returns** all the available groups.

**Return type** groups(list)

**get\_orders** ()

Get orders.

**Returns** all the available orders.

**Return type** orders(list)

**screener\_view** (*group='Sector', order='Name'*)

Get screener table.

**Parameters**

- **group** (*str*) – choice of group option.

- **order** (*str*) – sort the table by the choice of order.

**Returns** group information table.

**Return type** df(pandas.DataFrame)

### 6.3.2 Valuation

**class** finvizfinance.group.valuation.Valuation

Valuation inherit from overview module. Getting information from the finviz group valuation page.

### 6.3.3 Performance

**class** finvizfinance.group.performance.Performance

Performance inherit from overview module. Getting information from the finviz group performance page.

### 6.3.4 Spectrum

**class** finvizfinance.group.spectrum.Spectrum

Spectrum inherit from overview module. Getting information from the finviz group spectrum page.

**screener\_view** (*group*='Sector', *order*='Name', *out\_dir*='')

Get screener table.

**Parameters**

- **group** (*str*) – choice of group option.
- **order** (*str*) – sort the table by the choice of order.

## 6.4 News

Getting trading news.

**class** finvizfinance.news.News

Getting information from the finviz news page.

**get\_news** ()

Get insider information table.

Retrieves table information from finviz finance news.

**Returns** news table

**Return type** news(dict)

## 6.5 Insider

Getting trading insider.

**class** finvizfinance.insider.Insider (*option*='latest')

Getting information from the finviz insider page.

**Parameters** **option** (*str*) – choose a option (latest, latest buys, latest sales, top week, top week buys, top week sales, top owner trade, top owner buys, top owner sales, insider\_id)

**get\_insider()**

Get insider information table.

**Returns** insider information table

**Return type** df(pandas.DataFrame)

## 6.6 Forex

Getting foreign exchange information.

**class** finvizfinance.forex.Forex

Getting information from the finviz forex page.

**chart** (forex, timeframe='D', urlonly=False)

Get forex chart.

**Parameters**

- **forex** (str) – foreign exchange name
- **timeframe** (str) – choice of timeframe(5M, H, D, W, M)
- **urlonly** (bool) – choice of downloading charts, default: downloading chart

**Returns** url for the chart

**Return type** charturl(str)

**performance** (change='percent')

Get forex performance table.

**Parameters** **change** (str) – choose an option of change(percent, PIPS)

**Returns** forex performance table

**Return type** df(pandas.DataFrame)

## 6.7 Crypto

Getting crypto currency information.

**class** finvizfinance.crypto.Crypto

Getting information from the finviz crypto page.

**chart** (crypto, timeframe='D', urlonly=False)

Get crypto chart.

**Parameters**

- **crypto** (str) – crypto currency
- **timeframe** (str) – choice of timeframe(5M, H, D, W, M)
- **urlonly** (bool) – choice of downloading charts, default: downloading chart

**Returns** url for the chart

**Return type** charturl(str)

**performance** ()

Get crypto performance table.

**Returns** crypto performance table

**Return type** df(pandas.DataFrame)

## 6.8 Future

Getting future information.

**class** finvizfinance.future.**Future**

Getting information from the finviz future page.

**performance** (*timeframe*='D')

Get forex performance table.

**Parameters** *timeframe* (*str*) – choice of timeframe(D, W, M, Q, HY, Y)

**Returns** forex performance table

**Return type** df(pandas.DataFrame)

## 6.9 Earnings

Getting earning dates information.

**class** finvizfinance.earnings.**Earnings** (*period*='This Week')

Partition dataframe of ticker information of period of earning dates(This Week, Next Week, Previous Week, This Month) into dates

**Parameters** *period* (*str*) – choose an option of period(This Week, Next Week, Previous Week, This Month).

**output\_csv** (*output\_dir*='earning\_days')

Output dataframes to csv files.

**Parameters** *output\_dir* (*str*) – name of the output directory.

**output\_excel** (*output\_file*='earning\_days.xlsx')

Output dataframes to single Excel file.

**Parameters** *output\_file* (*str*) – name of the output excel file.

**partition\_days** (*mode*='financial')

Partition dataframe to separate dataframes according to the dates.

**Parameters** *mode* (*str*) – choose an option of period(financial, overview, valuation, ownership, performance, technical).

## 6.10 Calendar

Getting economic calendar information.

**class** finvizfinance.calendar.**Calendar**

Getting information from the finviz calendar page.

**calendar** ()

Get economic calendar table.

**Returns** economic calendar table

**Return type** df(pandas.DataFrame)

## CHAPTER 7
